

ADVANCED CLEAR ALIGNER TECHNOLOGY

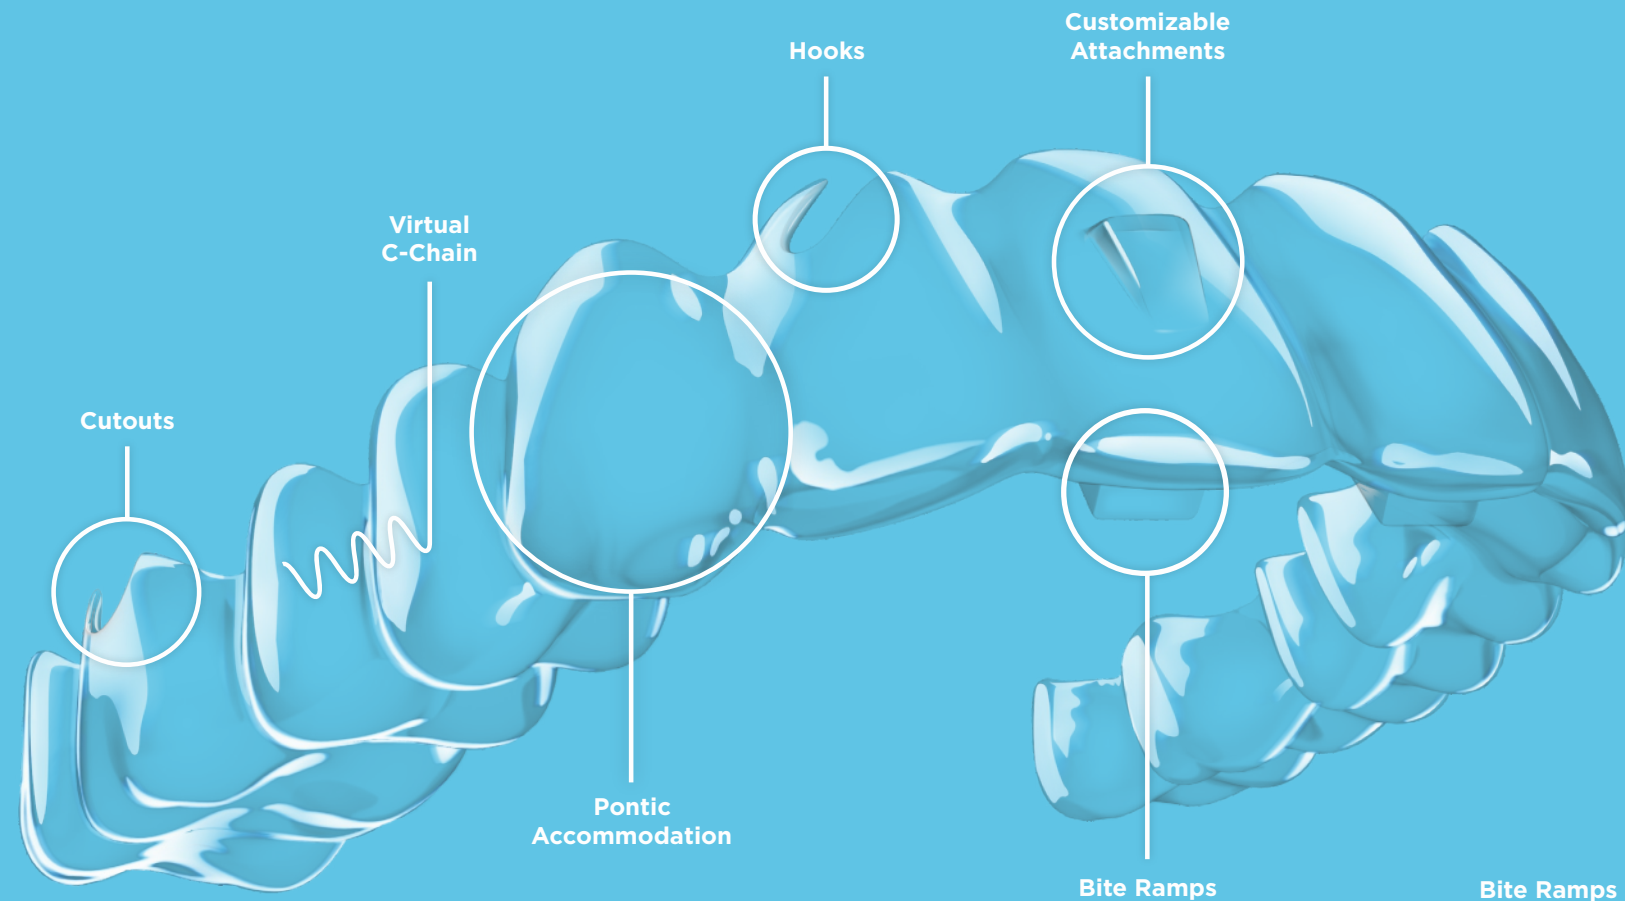

Ormco™

DESIGNED TO MEET THE NEEDS OF THE ORTHODONTIST

With clinical experience from trusted doctors around the world, Spark has created an advanced clear aligner system that is designed to meet the needs of the orthodontist and deliver your treatment vision.

From Ormco, where your practice is our priority.

Bite Ramps are also available for lower arches

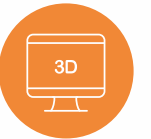

ALIGNER INNOVATION REDEFINED

The TruGEN™ is the latest material innovation, with higher sustained force retention than the leading aligner brand.¹

FLEXIBLE 3D SOFTWARE

Proprietary Spark™ Approver software, designed to put more control in the doctors hands.¹

100% OF PATIENTS SURVEYED WOULD RECOMMEND SPARK TO A FRIEND

Spark aligner system is more clear, more comfortable and more stain resistant than the leading brand.^{2,3}

Spark Clear Aligner System has far exceeded my expectations and is an absolute home run.

- Dr. Bill Dischinger*

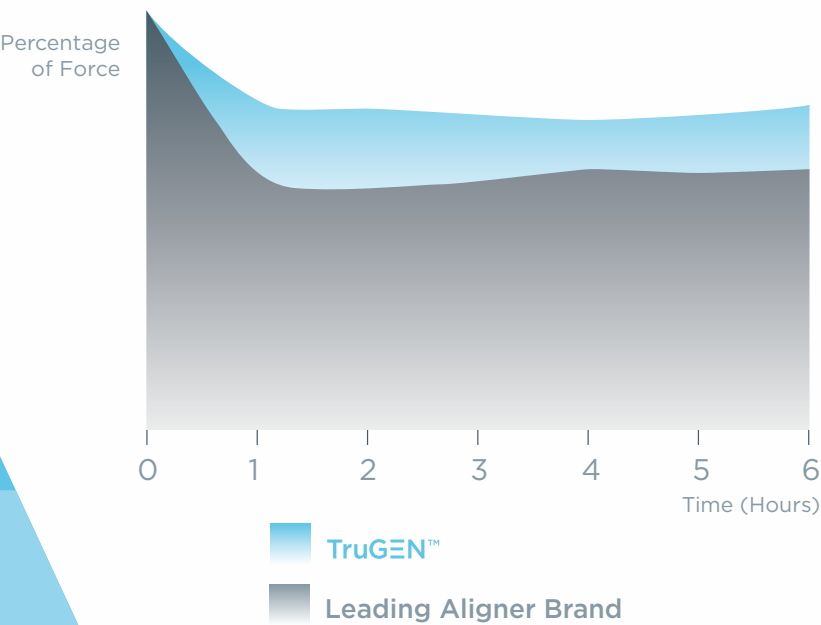

1 Spark™ Clear Aligner is designed to have high force retention than the leading aligner based on laboratory analysis against a reference standard. Data on file.
2 Spark™ Clear Aligner is designed to be more clear than the leading aligner based on laboratory analysis against a reference standard. Data on file.
3 Spark™ Clear Aligner is designed to be more comfortable than the leading aligner based on laboratory analysis against a reference standard. Data on file.

ALIGNER INNOVATION REDEFINED

TruGEN™ is the latest innovation in proprietary branded aligner material, which is designed to deliver an aligner that is more clear², with higher sustained force retention¹, and is proven to stain less than the leading competitor.⁴

MORE SUSTAINED FORCE RETENTION¹

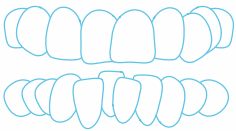

TruGEN™ is proven to provide sustained force retention which may result in more efficient and effective tooth movement compared to the leading aligner material.¹

The TruGEN aligner material is crystal clear and the software interface is amazing.
– Dr. Stuart Frost*

AP CORRECTION

Contraindication: If a patient has active periodontal disease treatment with aligners should be avoided or delayed until patient is free from symptoms of active periodontal disease.

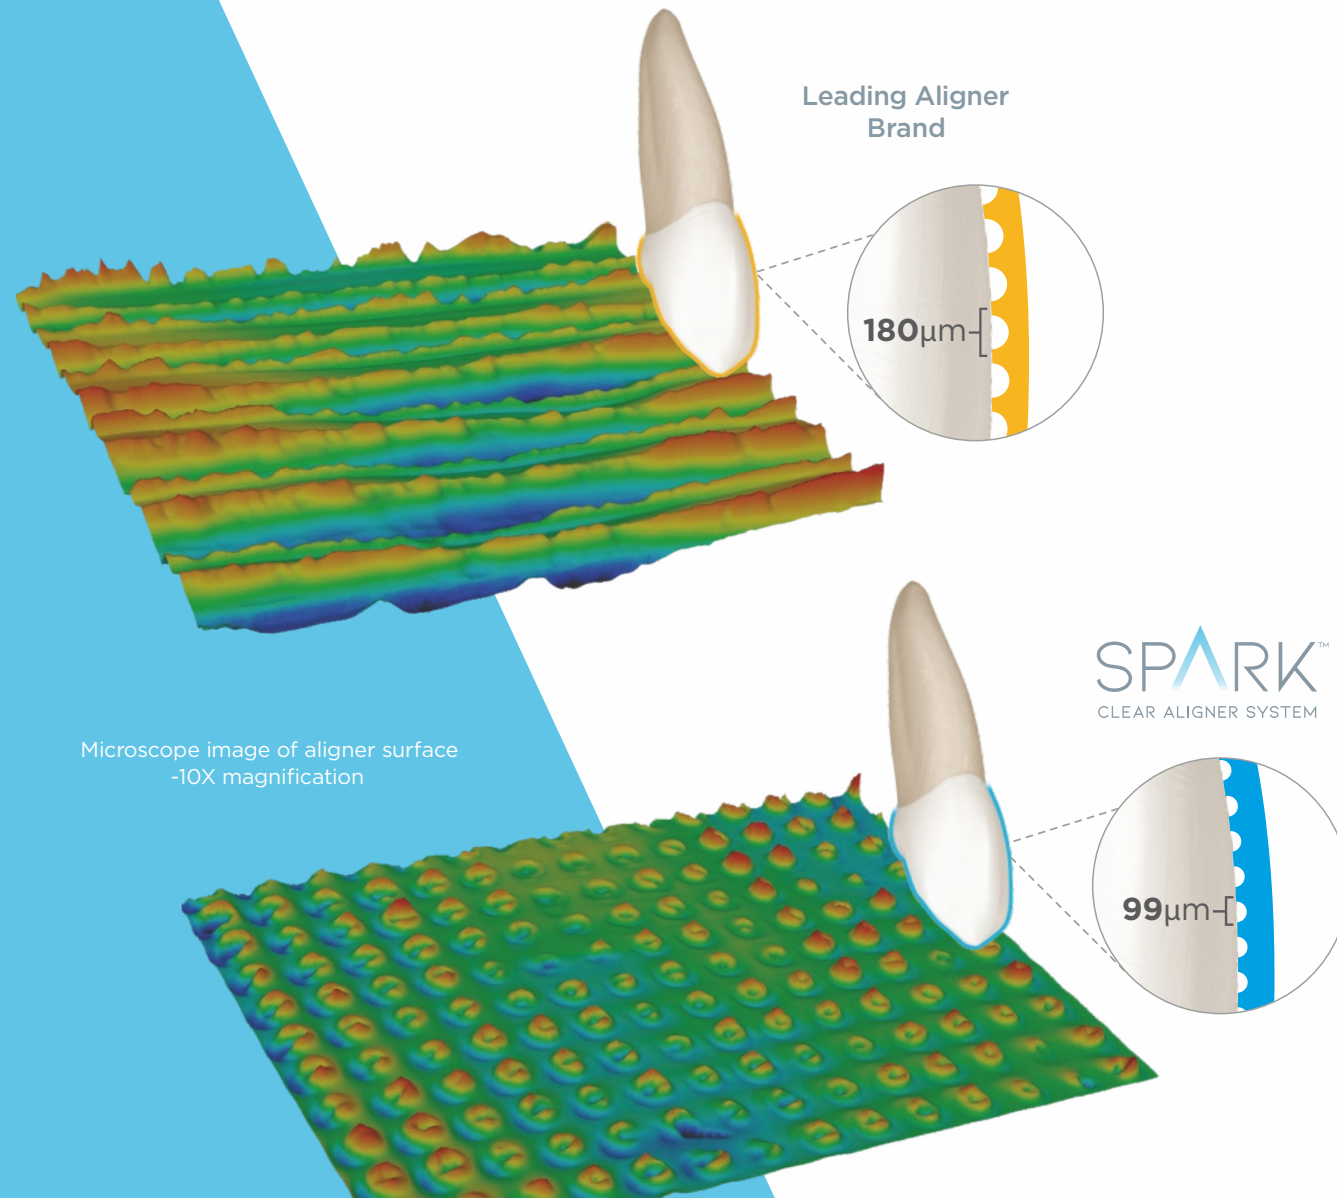

1 Spark™ Clear Aligner is designed to have high force retention than the leading aligner based on laboratory analysis against a reference standard. Data on file.
2 Spark™ Clear Aligner is designed to be more clear than the leading aligner based on laboratory analysis against a reference standard. Data on file.
4 Spark™ Clear Aligner is designed to have reduced staining than the leading aligner based on laboratory analysis against a reference standard. Data on file.

Spark sets a new standard in clarity for aligners.
– Dr. Jeffrey Heinz*

THE SCIENCE BEHIND SPARK

With the latest advancements in material science and manufacturing technology, you can confidently achieve excellent clinical results with Spark™.

1

BETTER PRINTING RESOLUTION

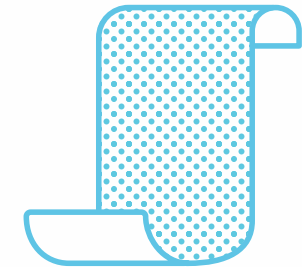

Spark aligners are manufactured with 80% better printing resolution than the leading aligner brand.*

2

MORE UNIFORM SURFACE

Spark Aligners have a more uniform surface texture versus the leading aligner competitor.*

3

BETTER CONTACT

When contacting the same tooth, Spark Aligners have better contact surface area than the leading aligner brand. The difference is statistically significant.*

DESIGNED TO GIVE YOU MORE CONTROL

Spark™ Approver software is designed to put more control in the doctor's hands. Built-in flexibility allows you to specify multiple setups at submission, add fully customizable features such as attachments, cutouts, hook and bite ramps and visualize the projected end result of treatment through simulated roots.

The Spark™ Aligner System is backed by our proprietary 3D Approver Software™, dedicated case designers, and a customer focused support team, all with one common goal: delivering on your treatment vision. Why settle for anything less?

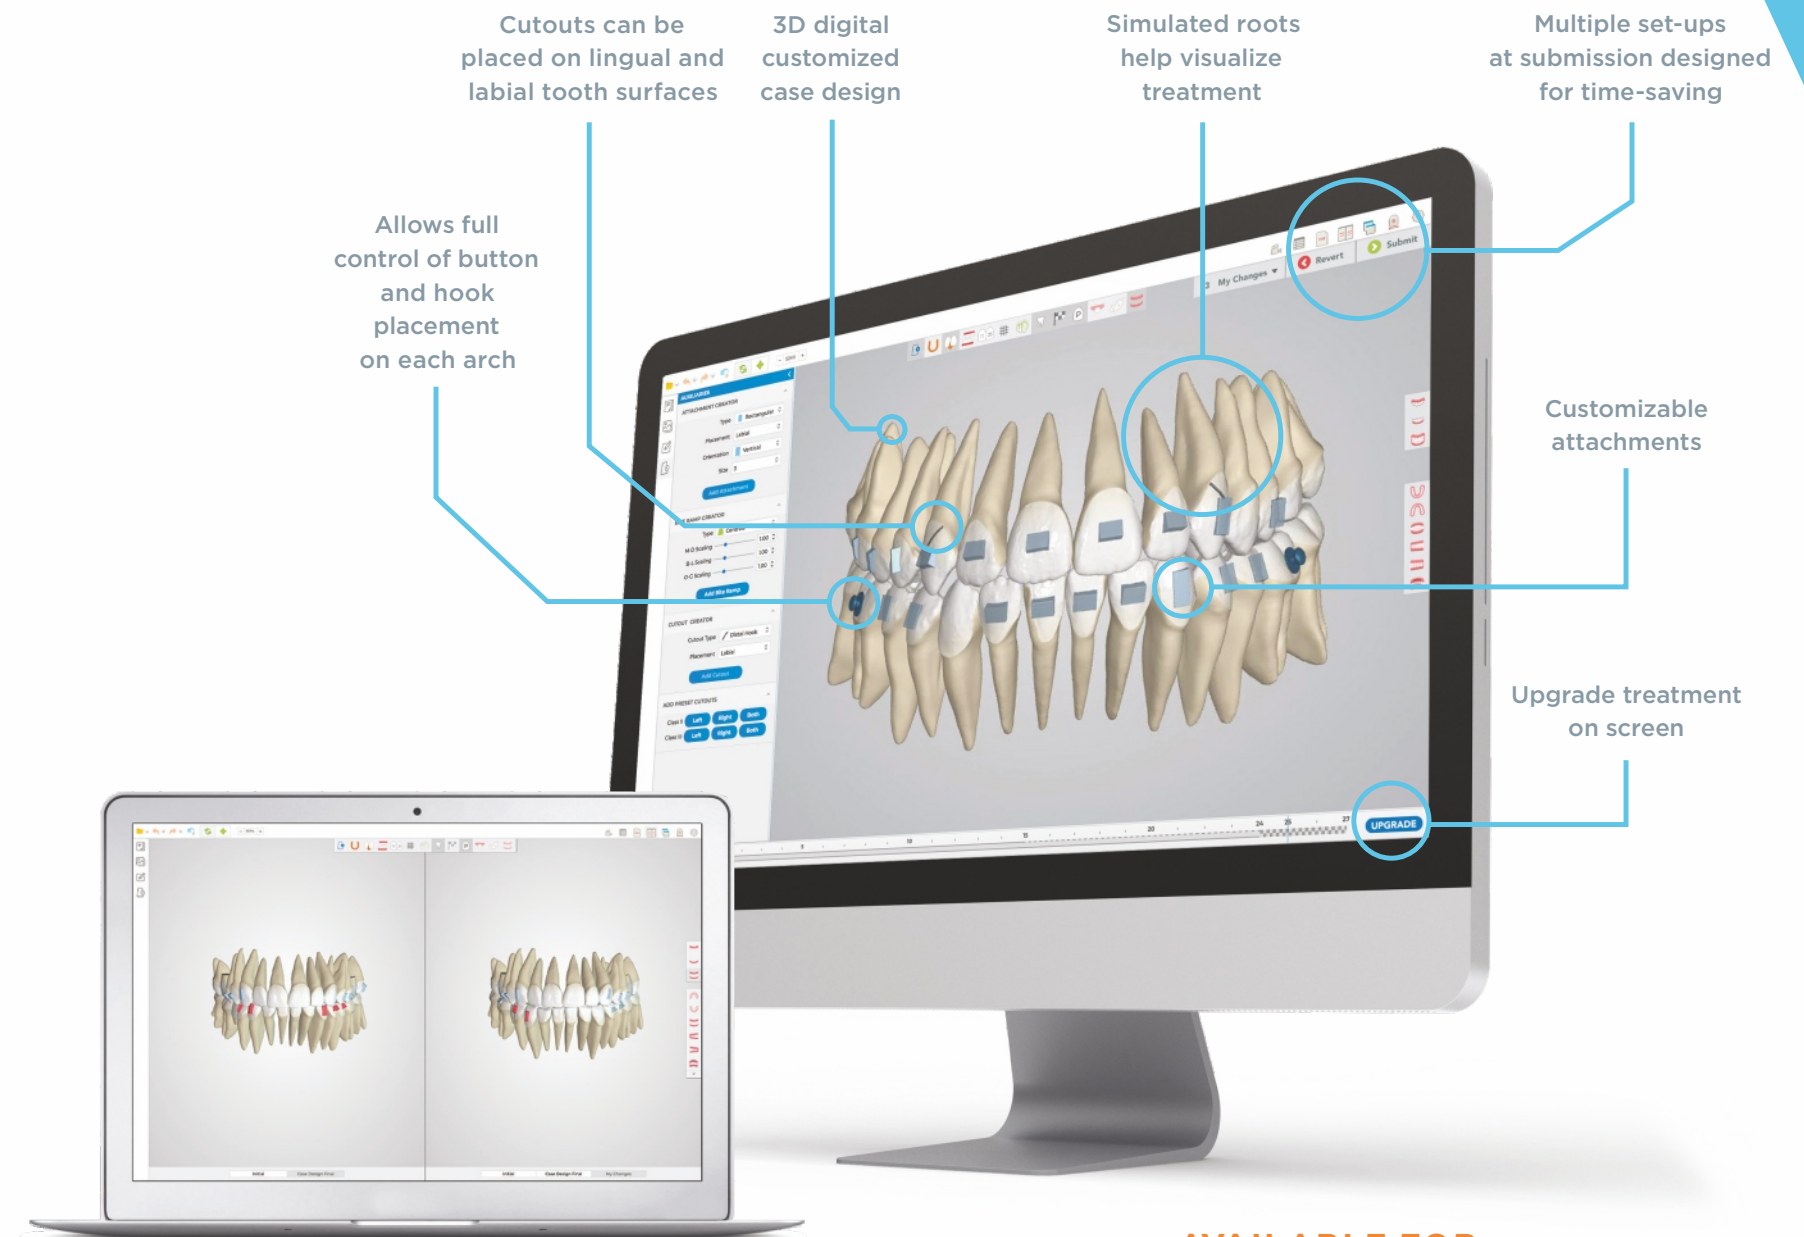

I love my spark cases. I really believe that plastic is 200% better than the leading aligner and teeth movement is much better and faster.

– Dr. Andre Nazarov*

MORE CLEAR

The TruGEN™ material is designed to be more clear than the leading competitor.²

MORE COMFORTABLE

Custom trays are designed with polished scalloped edges to help enhance patient comfort.³

REDUCED STAINING

Spark™ Clear Aligner System is proven to have minimal aligner stains compared to the leading aligner brand.⁴

I have been in both the leading brand and Spark and I can say without a doubt I would choose Spark hands down! It has not only been more comfortable but my teeth have never tracked as well as they do now.*

- Ashleigh C. Actual Patient

*These opinions are of patients treated. Results may vary from patient to patient.

1 Spark™ Clear Aligner is designed to have high force retention than the leading aligner based on laboratory analysis against a reference standard. Data on file.
2 Spark™ Clear Aligner is designed to be more clear than the leading aligner based on laboratory analysis against a reference standard. Data on file.
3 Spark™ Clear Aligner is designed to be more comfortable than the leading aligner based on laboratory analysis against a reference standard. Data on file.
4 Spark™ Clear Aligner is designed to have reduced staining than the leading aligner based on laboratory analysis against a reference standard. Data on file.

SAY SO LONG TO THE STATUS QUO

“Our assistants were blown away by how user-friendly the attachment template is to use!”
– Dr. Jeffrey Heinz*

“There are some features that I immediately loved about the Spark Approver Software, including viewing the occlusion at any stage. This allows me to see if there are going to be any interferences, which saves me time and helps me proactively plan the treatment for my patients.”
– Dr. Mike DePascale*

“When we switched our existing aligner patients into Spark Clear Aligners they were ecstatic with how Spark was lighter, thinner and the clarity of the TruGEN™ material really stood out to them.”
– Dr. Bill Dischinger*
