something great.  
Start with your smile.

# Invisalign clear aligners.

## Made to move you forward.

Invisalign is the most advanced clear aligner system in the world. Each feature is designed to reveal the smile that you deserve.

Because it's not just your smile that's full of potential.

Removable

Comfortable

Nearly invisible

# Pushing what's possible.

**Life can continue as normal, as the Invisalign System discreetly does its work.**

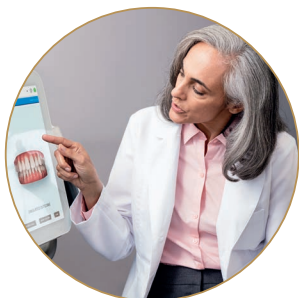

You can comfortably wear your aligners for 22 hours a day. And because the aligners are removable, it's easy to maintain your regular oral hygiene and enjoy your usual diet.

As you progress, replacing your aligners every 1-2 weeks, people may notice a gradual change in your smile.

# Three steps forward. No steps back.

The Invisalign treatment process is as straightforward as it is technically advanced.

1

Once your Invisalign Provider has confirmed that you are eligible for treatment, they will take photos, X-rays and digital scans, or a dental impression, of your teeth.

2

You'll receive a series of custom-made aligners to wear every day and change at home – on average every 1-2 weeks.

3

You'll visit your provider around every 6-8 weeks to monitor progress and receive new aligners.
